

SHREERAM GAJANAN PARAB

8451962848 | shreeramparab18@gmail.com | Kalyan, Maharashtra

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming: C/C++, Python, SQL, R, MongoDB.

Tools & Platforms: Git, GitHub, Jupyter Notebook, Power BI, Tableau, Docker.

Data Concepts: Data Modeling (OLAP/OLTP), Data Cleaning, Data Wrangling.

Visualization: NumPy, Matplotlib, Pandas, Seaborn.

PROFESSIONAL EXPERIENCE

Research & Development Intern, Dev Innovations Lab / TheRoac (Feb 2026 – Apr 2026)

- Conducted market research and competitive analysis for EdTech platform positioning and audience targeting
- Cleaned and analyzed structured/unstructured data to drive product development and decision-making
- Collaborated with tech teams to translate business requirements into technical solutions during TheRoac platform development

KEY PROJECTS & EXPERIENCE

Facial Golden Ratio Detection: Developed Python-based image processing system analyzing facial symmetry; implemented algorithms to calculate golden ratio proportions from landmarks.

Traffic Analysis System (Computer Vision): Built real-time OpenCV-based vehicle detection system; analyzed traffic density patterns to identify congestion peaks; enabled automated monitoring.

Route Optimization System: Designed ML-based route prediction model for shortest travel time; integrated mapping APIs for dynamic route calculation; reduced estimated travel time via predictive modeling.

Career Insight Dashboard (Power BI): Analyzed 39,000+ job postings; built interactive dashboards with role/location/skills filters; identified in-demand skills and market trends.

Global Job Trends Dashboard: Visualized job distribution and salary insights across regions; identified education-compensation correlations; designed user-friendly dashboards for business intelligence.

EDUCATION

M.S. Data Analytics (Pursuing) — Department of Information Technology, University of Mumbai, Kalina

B.S. Information Technology (June 2022 – March 2025) — Model College of Science and Commerce, Kalyan

CGPA: 9.05

CERTIFICATIONS & TRAINING

- C/C++ Programming Training – OOP concepts (classes, inheritance, polymorphism)
- Python Programming Training – Data structures, OOP, data manipulation
- Deloitte/Forage Data Analytics Simulation – Practical data analysis and reporting
- Research Methodology Course (Udemy) – Structured research and documentation techniques
