

Shreeram Gajanan Parab

8451962848 | shreeramparab18@gmail.com | Kalyan, Maharashtra

■ Objective

Motivated and detail-oriented Master's student (Data Analytics) with a strong foundation in programming, algorithms, and data-driven problem solving. Passionate about optimizing complex systems and applying analytical thinking to real-world challenges. Seeking an internship where I can contribute to projects involving data processing, high-performance computing, or machine learning while continuing to grow my technical expertise.

■ Technical Skills

- Programming Languages: C/C++, Python, SQL, R, MongoDB
- Tools :Git ,Github , Jupyter Notebook , Power BI, Tableau
- Data & Visualization Tools: NumPy, OpenCV , Seaborn, Matplotlib

■ Key Projects & Experience

- Facial Golden Ratio Detection (Python, Google Colab): Built a collaborative project that analyzes facial proportions using image processing to calculate the golden ratio.
- Global Job Trends Dashboard (Power BI): Designed an interactive dashboard showing job distribution, average salary, and education-level insights.
- Computer Vision Traffic Analysis (OpenCV): Developed a real-time vehicle detection system to study traffic flow patterns.
- Route Optimization System: Created a route planning algorithm using ML to predict the shortest travel time with mapping APIs.
- Data Analytics Portfolio: Completed Deloitte job simulation and performed pay equity analysis using Excel, Power BI, and Tableau.

■ Education

Masters of Science (Data Analytics)

University of Mumbai – Pursuing

Bachelor of Science (B.Sc. IT)

Model College of Science and Commerce, Kalyan (Aug 2022 – May 2025) – CGPA: 9.05

■ Certifications & Training

- C , C++ Programming Training – Object-oriented concepts including classes, inheritance, and polymorphism. Strong foundation in procedural programming, pointers, and memory handling.
- Python Programming Training – Comprehensive coverage of data structures, OOP, and data manipulation.
- Deloitte / Forage Data Analytics Simulation – Practical data analysis and reporting exercises.
- Research Methodology Course (Udemy) – Training in structured research and documentation techniques.

■ Strengths & Focus Areas

- Analytical Problem Solving – Strong logical reasoning and ability to turn complex data into actionable insights.
- Programming & Algorithms – Confident in C/C++ and algorithm design for performance-oriented solutions.
- Collaboration & Organization – Clear communicator with strong research and documentation habits.
